The elemental influence of Air would fan the flames of fire, Water would put them out and Earth would smother them.

Aries is a Cardinal, Masculine Fire sign. They are first of the astrological year and are filled with a pioneering spirit and are natural leaders. Aries are dynamic, straight forward and energetic people. They are always on the move and wanting to do something. Routine and patience is almost unbearable for them. They secretly disguise how important winning or being the brightest or best is to them and others would have no idea.

**ARIES HEALTH** Colds that would floor lesser mortals have practically no effect on Aries. They are able to shrug off sniffles and sneezes. A more serious illness would lead Aries to depression if it restricts their ability to move about. Aries suffer particularly from: Fevers, broken bones or other injuries, neuralgia, headaches and migraines. Also can be prone to Illness of the eyes, ears and have sinus trouble. Body parts linked to Aries are: Head, Brain, Eyes, Ears, Sinuses and bones. (An individual birth chart will show if any of these body parts have inherited strength or vulnerability).

**ARIES LOVE** You love the excitement of the chase and can be exceptionally romantic. As with everything else you have trouble sticking to things long-term. You must ensure the relationship will have challenges if it's going to last. Aries falling in love are very direct and a little intimidating preferring to be the pursuer and not the pursued. They place the object of their affection onto a pedestal and will pull out all the stops to impress. They are romantic and old fashioned. Aries in love would expect absolute fidelity (but not necessarily from themselves) and to be admired by their lover. Aries need their lovers to share their boundless enthusiasm and to be constantly busy. An Aries lover should treat them as if they were the only man/woman in the world. To Aries love and sex is always strongly influenced by the myth that the grass is always greener. But, in fact Ariens need a long-term loving relationship to be able to find true sexual fulfilment as they need the mental closeness that such relationships can bring. Eventually Aries will have to overcome their inner restlessness.

Each zodiac signs sits within a repeating segment from which is sub divided (1.618) to show the sign illustration and it's consolation below. All segments revolve around OM at the centre. Each sign illustration has spirals within it that connects points of energy to the next in each direction. Now that it is finally completed the 12 are in place around 1 and all consolations are joined in the space. Each individual star segment is a painting in its own right, ink on water colour paper with the illustration drawn in white pastel.
