Gemini's ruling planet is Mercury, The Messenger of the Gods.

The elemental influence for Gemini is mutable, air although; Gemini is more a breeze or a wind rather than air itself. Air can be trapped in a jar, but you cant trap a breeze in a jar anymore than you can pin down a Gemini.

The symbol of the twin is the key to the endlessly contradictory Geminian character. While they have not all got split personalities, they come close. Geminians tend to mask loneliness; they seem to be in search all the time. This is usually interpreted as a search for a missing twin, but it probably isn't a person at all; its a quest to unite the deeply divided spiritual and earthly parts of the Geminian psyche.

**HEALTH** Gemini's are usually moving too fast to get struck down with ill health. Nervous exhaustion is a potential problem for Gemini if they can't find a satisfactory way of relaxing and winding down. Gemini's don't often complain, unless they are too hot or too cold, which seems to be something they just cant stand. They suffer particularly from coughs and cold, circulation problems and exhaustion. The body parts traditionally linked to the

strong influence of Gemini are hair, nervous system, speech, shoulders, lungs, arms, hands and fingers.

**LOVE** Being in love with a Gemini is a bit like a male fantasy dating twins, except one is the most wonderful person and the other is the wicked witch of the west. Not only, that but it is impossible to work out which is in the room with you. When a Gemini falls in love they get extremely confused by their emotions. They are very sensitive and are easily hurt by unexpected reactions. They feel so very deeply but find this very hard to express and tend to appear much more unconcerned than you are. Gemini expects a very light load of emotional demands and a lover who is patient and forgiving. Suitable love matches for the typical Gemini are Libra & Aquarius

The wheel is complete - commenced in March 2009 and completed November 2009 - a nine month gestation. Each zodiac signs sits within a repeating segment from which is sub divided (1.618) to show the sign illustration and it's consolation below. All segments revolve around OM at the centre. Each sign illustration has spirals within it that connects points of energy to the next in each direction. Now that it is finally completed the 12 are in place around 1 and all consolations are joined in the space. Each individual star segment is a painting in its own right, ink on water colour paper with the illustration drawn in white pastel.
